SUMMARY

With more than 1 year of professional software development experience, I possess a robust understanding of fundamental concepts and practical skills in coding, debugging, and teamwork collaboration. I have versatile proficiency across multiple programming languages, tools, and frameworks, with hands-on experience in realworld applications. My adaptability and contribution potential in the ever-evolving software development landscape make me an asset to any team. I eagerly anticipate utilizing my skills to address fresh challenges and contribute to innovative projects.

RELEVANT EXPERIENCE

Associate Software Developer

Lanatus Systems LLP

05/2023 - Present Badvel, India

Key Responsibilities:

- As a vital member of the Lanatus Systems development team, I specialized in crafting robust web applications, particularly focusing on frontend development using React.js and JavaScript. My expertise contributed significantly to enhancing the user experience.
- On the backend, I utilized Java and Spring Boot to create scalable serverside applications. Collaborating within an agile environment, I contributed to the full development lifecycle, including sprint planning, code reviews, and problem-solving.

Software Developer Intern

InfoLabz

01/2023 - 04/2023 Ahmedabad, Gujarat, India

Key Responsibilities:

- As a Software Developer Intern, I excelled during my internship at InfoLabz. I collaborated seamlessly with cross-functional teams, contributing to the development of innovative projects. My focus on fostering a collaborative environment ensured the timely delivery of top-tier software solutions.
- I led the design and implementation of comprehensive solutions utilizing Java and Spring Boot, enhancing backend functionality for robust performance. Additionally, I crafted dynamic and responsive front-end interfaces using JavaScript and React, further enhancing user experience and engagement.

SKILLS

Java	Spring Boot	Spring Security	AWS/S3/EC2	
Docker	Microservice Architecture		JDBC	Maven
Gradle	Hibernate	DSA	OOPS	Auto Configuration
oAuth 2	PostgreSQL	MySQL	MongoDB	DBeaver
GIT				

PROJECTS

Portfolio

https://tarun-vavadiya.vercel.app/

As an accomplished software developer, I've built a robust portfolio that demonstrates my skills in designing, developing, and fine-tuning software solutions.

My portfolio features a wide array of projects, highlighting my proficiency across various technologies and programming languages.

Financial Advisor

https://www.advisorcheck.com/

Advisor Check is a handy app that connects to company systems, offering financial advice anytime, anywhere.

It's super safe, keeping client data private, and easy to use for everyone, making financial planning a breeze.

Integ

Managed Integ, a CRM project, from beginning to end. Handled design, development, and deployment to make a user-friendly tool for better client relationships and smoother business operations.

Collaborated with cross-functional teams to ensure Integ met client needs and exceeded expectations.

EDUCATION

Bachelor of Engineering (Information Technology)

Government Engineering College Gandhinagar

07/2019 - 06/2023

CGPA
8.48 / 10

CERTIFICATION AND COURSES

Java Programming Certificate

Java Programming: Principles of Software Design

Ultimate AWS Certified Developer Associate 2024
